

CDN FERTIGATION MIXER

THE SYSTEM THAT YOU CAN TRUST

Few important facts about CDN:

- ✓ fully automatic control of EC and pH;
- ✓ dosing from up to 8 independent stock solutions;
- ✓ control of 320 irrigation valves (16 from mainboard);
- ✓ control of 3 independent pumps and 4 extra outputs;
- ✓ 10 independent groups;
- ✓ possibility of connection 8 external starts, analogue sensors like weight tray (4-20mA), flow-meter, solar radiation sensor, and much more;
- ✓ PC connection with user friendly software (can be made directly or via internet);
- ✓ unique and pioneer way of drainage control;
- ✓ prepared to manage the process of recirculation;
- ✓ automatic control of filter cleaning and extra agitators;
- ✓ can be installed in "in-line" and "by-pass" mode (with small and big flows);

In our mixer we use only high quality and reliable components. All electronics parts are designed and produced by INTA, so we know exactly how this system works.

Our engineers are very close to the growers, that's why CDN is user friendly and easy to operate.

Every year we update the programme of CDN, to be sure that our customers have got all they need to produce in the most modern and efficient way.
